

Computer Organization and Assembly language

Course: Computer Organization and Assembly Language (Lab) - CS-318

Displaying Message in EMU8086

Objective:

Learn how to display messages on the screen using DOS interrupts.

Theory:

DOS interrupt INT 21h with function 09h can display a string.

The string must be terminated with \$.

Syntax:

```
MOV DX, OFFSET message
```

```
MOV AH, 09h
```

```
INT 21h
```

Example Program:

```
ORG 100h ; COM file start
```

```
MOV DX, OFFSET msg
```

```
MOV AH, 09h
```

```
INT 21h
```

```
MOV AH, 4Ch ; Exit program
```

INT 21h

msg DB 'Hello, EMU8086 World!\$', 0

Lab Exercise

- Display multiple lines of text using multiple string displays.
-
