

Assignment of Algorithms

Q1. Difference between Incremental Line Algorithm (DDA) and Bresenham Line Algorithm

Compare both algorithms based on:

- Working principle
- Type of arithmetic used
- Accuracy and speed
- Advantages and limitations

Q2. Difference between Midpoint Circle Algorithm and Bresenham Circle Algorithm

Mention points like:

- How each algorithm selects the next pixel
- Use of symmetry
- Type of arithmetic used
- Efficiency and ease of implementation

Q3. Difference between Boundary Fill Algorithm and Flood Fill Algorithm

Compare both algorithms based on:

- Working method and seed point
- Connectivity (4-way and 8-way)
- Memory use and recursion
- Limitations and applications
